ENTRY-LEVEL IT & CYBERSECURITY PROFILE

Cybersecurity and Network Systems student with 54 of 60 credits completed toward an A.S. degree. Building hands-on skills in IT support, Windows systems, networking, Linux, Microsoft Server, database basics, virtualization, and cybersecurity fundamentals. Security operations background with experience monitoring controlled environments, documenting incidents, enforcing access procedures, and following strict security protocols. Open to entry-level technology opportunities where I can gain hands-on experience, support users and systems, solve technical problems, and grow in the IT field.

TECHNICAL SKILLS

IT Support: Technical support, customer service, troubleshooting, clear documentation, and following procedures

Windows & Hardware: Windows client configuration, PC hardware diagnostics, computer maintenance, and software installation

Networking: TCP/IP basics, IP addressing, network troubleshooting, and router/switch/access point concepts

Systems & Security: Linux administration fundamentals, Microsoft Server basics, access control, security monitoring, and incident documentation

Data & Tools: SQL/database basics, virtualization concepts, Microsoft Office, IT project management, and digital forensics basics

EDUCATION

East River High School | High School Diploma - Completed 2021

Eastern Florida State College | Associate in Science, Cybersecurity and Network Systems - Expected 2027

Progress: 54 of 60 credits completed toward A.S.; general education requirements complete.

Completed technical coursework: Network+, Computer Maintenance & Repair, Exploring Digital Technology, Microcomputer Applications, IT Project Management, Microsoft Client O/S.

In-progress/preregistered coursework: Database Techniques, Linux Networking/System Administration, MS Server O/S Install & Config, Network Security Fundamentals, Foundations of Digital Forensics, Virtual Infrastructure Planning/Design.

TECHNICAL COURSEWORK & LABS

- Performed PC hardware diagnostics, component troubleshooting, computer maintenance, Windows client configuration, and desktop support tasks in class/lab environments.
- Applied TCP/IP concepts, IP addressing, routing and switching concepts, network troubleshooting, Network+ objectives, and secure operations concepts through coursework.
- Building skills in Linux system administration, Microsoft Server configuration, database management, virtualization, network security, and digital forensics.

PROFESSIONAL EXPERIENCE

Security Screener | Allied Universal | Cape Canaveral, FL - Feb 2024 - Present

- Monitor passenger and staff activity in secured environments to identify suspicious behavior and potential security risks.
- Perform screenings using X-ray and detection equipment while following security protocols and access control procedures.
- Document incidents, maintain security logs, and report irregular activity to supervisors and partner agencies.
- Coordinate with supervisors, law enforcement, and emergency responders during security incidents and safety events.

Cable Assembler | Aero Electronics Systems, Inc. | Titusville, FL - Jun 2022 - Jan 2023

- Assembled aerospace wiring systems following technical specifications, quality requirements, and safety procedures.
- Conducted circuit testing to verify functionality, accuracy, and compliance with standards.
- Performed soldering and quality assurance tasks requiring precision, attention to detail, and consistency.

Grocery Stocker | Walmart | Orlando, FL - May 2021 - Aug 2021

- Restocked merchandise, maintained organized inventory, assisted customers, and followed workplace safety procedures.
